

Irrigation webinar series

Webinar 5: Securing your future water needs
Harnessing carryover and other water products

This webinar will discuss smart ways of taking advantage of the current low water prices to better manage future water price risk in 2021-22 and beyond.

TOPICS

- Situation and outlook for southern Murray Darling Basin (sMDB) water allocations and the water market - and what the outlook means for securing future water requirements
- Current opportunities with carryover water, allocation forwards, entitlement leases and carryover leasing (parking)
- Implications of carryover rules and spillable water, for irrigators
- Protecting and accessing your carryover
- Balancing the costs, benefits and risks of carryover and other water products in your farm water portfolio.

Expert Speakers

Phil Grahame. General Manager. Ruralco Water.
 Phil has over 10 years of experience in water broking with a diverse range of clients across the connected sMDB.

Andrew Shields. River Operations Manager. Goulburn- Murray Water.
 Andrew manages surface water, including GMW seasonal determinations, allocation outlooks and river flow planning.
